Summary

Motivated Backend Developer with a strong foundation in Node.js, Express, and MongoDB, passionate about building efficient and scalable backend systems. Skilled in designing and developing RESTful APIs, implementing JWT authentication, and integrating Cloudinary image uploads. Experienced in connecting frontend and backend services for smooth data flow and performance. I'm always eager to learn, write clean code, and contribute to meaningful software solutions..

Skills

Web Development: HTML | CSS | JavaScript | Node.js | MongoDB | Express

Networking: Cisco CCNA | CompiaTIA Network +

Tools & Technologies: Git, VS Code, Networking Tools

Soft Skills: Problem Solving, Communication, Teamwork, Time Management

Experience

Backend Developer Mest [May 2025 – Present]

- Built RESTful APIs to connect different parts of web and mobile apps, making sure everything works smoothly.
- Talked with clients to understand what they needed and created solutions that matched their goals.
- Made sure the apps worked well, loaded fast, and looked good on all devices, including phones, tablets, and computers.

System Engineer Masotech [Jun 2022-Nov 2024]

- Helped set up and take care of computer networks (LAN and WAN) to make sure everything stayed connected.
- Helped find and fix network problems like slow internet or connection issues.
- Worked with routers, switches, and firewalls, and learned how to set them up and use them.
- Installed CCTV cameras, including placing them, running cables, and setting them up to work properly.

Network Administrator (National Service) Madina Polyclinic Kekele [Sep 2019 – Nov 2020]

- Assisted in setting up and maintaining both local (LAN) and wide area (WAN) networks to ensure reliable and secure connections across different devices.
- Helped identify and fix network problems, such as slow connections, dropped signals, or hardware issues, to keep systems running smoothly.
- Gained practical experience working with networking equipment like routers, switches, and firewalls, learning how to configure and manage them in real work environments.

Projects

[Personal Portfolio](#) - A modern personal portfolio built using Tailwind CSS to highlight my projects and development skills.

[Sewor Styles](#) - A website built for a tailoring brand. The website aims to showcase services, allow client to contact the tailor and book an appointment online.

[Event API](#) - A backend API for managing events, built with Node.js and Express.js, demonstrating my understanding of RESTful API development.

[Weather API](#) - A weather API built with Node.js and Express.js that fetches live weather data using the OpenWeatherMap API.

Bookie API - A RESTful API built for managing book listings and user interactions. Developed using Node.js and Express with MongoDB for data storage. Includes features like user authentication, book CRUD operations, and secure routes for protected access.

Adify API - An advertisement marketplace API designed with Node.js, Express, and MongoDB. Supports user roles (admin, vendor, user), JWT authentication, advert posting, image uploads with Cloudinary, and search/filter features for ads.

RecycleMate API-Backend API for the RecycleMate waste pickup platform. Built with Node.js, Express, and MongoDB. It sends email notification during sign up and admin approval.

GAC Haasto API-A role-based Node.js + Express with MongoDB, featuring authentication (JWT), user management, counselor–member forms, and content management for announcements, news, and events.

Education

IPMC, Accra

June 2017- July 2019
Diploma in System Engineering

Ghana Communication Technology University, Tesano

Jan 2025- 2029 – Present [Weekend]
BSc.Information Technology.
