PROFESSIONAL SUMMARY

Backend Developer with strong expertise in Node.js, Express, and MongoDB, focused on building secure, scalable, and high-performance backend systems. Experienced in developing RESTful APIs, implementing JWT authentication, role-based access control, and integrating third-party services such as Cloudinary and email systems. Proven ability to design structured backend architectures, optimize performance, and deliver reliable solutions that support real-world applications.

TECHNICAL SKILLS

Backend Development:

Node.js | Express.js | MongoDB | Mongoose | RESTful API Design | JWT Authentication | Role-Based Access Control

Frontend & Integration:

HTML | CSS | JavaScript | API Integration

Tools & Technologies:

GitHub | VS Code | Postman | Cloudinary

Networking:

Cisco CCNA | CompTIA Network+ | LAN/WAN Configuration | Router & Switch Configuration | Firewall Management

PROFESSIONAL EXPERIENCE

Backend Developer

MEST Africa | May 2025

- Designed and developed secure RESTful APIs to power web applications.
 - Implemented JWT-based authentication and role-based authorization for secure access control.
 - Structured MongoDB schemas to ensure optimized data storage and retrieval.
 - Integrated Cloudinary for secure media uploads and management.
 - Improved backend response efficiency through optimized query handling.
 - Collaborated with frontend teams to ensure seamless API integration and performance.
-

System Engineer

Masotech | June 2022 – November 2024

- Configured and maintained LAN and WAN networks ensuring reliable connectivity.
 - Diagnosed and resolved network performance issues, reducing downtime.
 - Installed and configured routers, switches, and firewalls for secure infrastructure.
 - Led CCTV installation projects including system configuration and deployment.
-

Network Administrator (National Service)

Madina Polyclinic Kekele | September 2019 – November 2020

- Maintained secure and stable network systems across departments.
 - Troubleshoot connectivity and hardware issues to ensure operational continuity.
 - Assisted in configuring enterprise networking devices in real-world environments.
-

PROJECT EXPERIENCE

[Adify](#)

Advertisement marketplace backend built with Node.js, Express, and MongoDB.

- Implemented multi-role authentication (Admin, Vendor, User).
- Integrated Cloudinary for image uploads.
- Built advanced search and filtering functionality.

RecycleMate

Waste pickup platform.

- Implemented role-based system (Admin, Collector, User).
- Integrated email notifications for signup and approval workflows.
- Designed secure booking and tracking endpoints.

Bookie API

RESTful API for book listing management.

- Built secure authentication system.
- Implemented full CRUD operations with protected routes.

Event API & Weather API

- Designed structured API architecture.
- Integrated third-party APIs for live weather data retrieval.

EDUCATION

BSc. Information Technology (Weekend Program)

Ghana Communication Technology University – Tesano
January 2025 – Present

Diploma in System Engineering

IPMC – Accra
June 2017 – July 2019
